Is your message lost in the dark?

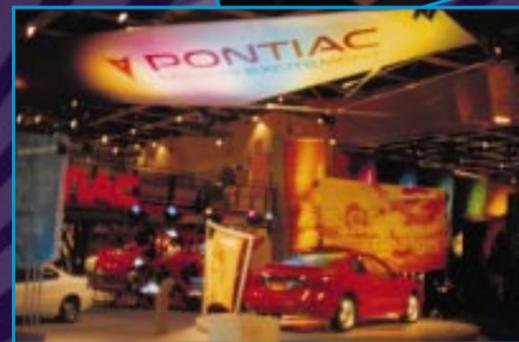

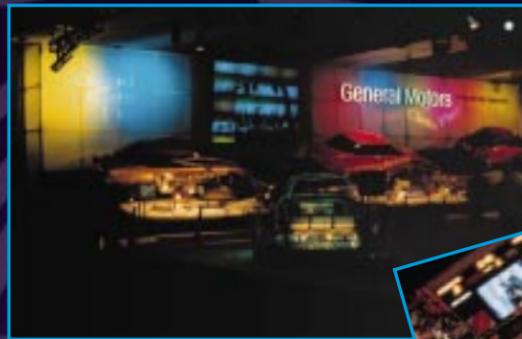

When it comes to lighting services for your events or exhibits, there is much to consider.

You'll want creative design that works — from a focused spot to a flood of illumination; that draws instant, non-stop attention and excitement or offers subtle, warm

ambiance. You'll need experienced people who have without-a-doubt knowledge of their craft and a complete understanding of your logistics and budget.

Turn on the light!

Turn to Spectacle Lighting Design — the experienced, creative lighting design team. From equipment, to the feeling, look and rhythm of lighting cues, we showcase your message dynamically and cost-effectively.

How many people does it take to...

At Spectacle Lighting Design, we choose the right staff, technology and tools every time for your particular project. A full understanding of your needs, proper planning and a comprehensive knowledge of lighting capabilities and technology makes it possible for Spectacle to "turn on the light" in the most dazzling manner possible. Our professional designers, programmers and project supervisors ensure that you receive only the best service and support.

As an independent design firm, Spectacle Lighting Design offers advantages beyond those of rental houses or equipment dealers. Not limited by the sole use of in-house equipment and trucking parameters, Spectacle Lighting Design bids equipment to houses appropriate to the showplace venue, saving time and costs. We maintain excellent, ongoing working relationships with many lighting manufacturers so our designs can fully utilize a large assortment of lighting tools, from traditional equipment to the latest in computer aided technology. Call us today at 734/547-5657 for brilliant lighting solutions!
